

## WHAT OTHER TOOLS COULD ENHANCE YOUR PRODUCTS?

*In this section, you will find additional offerings for publishers.*

# LEXILE FRAMEWORK<sup>®</sup>

## FOR READING

### What other tools could enhance your products?

---

Lexile products can offer further value to your use of Lexile measures as a publisher or content developer. Here we will explore some options. If your answer is “yes” to any of the following questions, read on!

- ➔ Do you want to target content to the reading abilities of the audience you're aiming to reach?
- ➔ Do you want to offer Lexile measures for a large collection of books?
- ➔ Do you want to offer your customers sought-after vocabulary information?

## PARTNER TOOLKIT

This section about additional offerings is part of our Toolkit for publishers, available at [lexile.global/publisher-toolkit](https://lexile.global/publisher-toolkit).

## Do you want to target content to the reading abilities of the audience you're aiming to reach?

Whether you're developing content for beginning readers, chapter books or complex subject matter information, **Lexile Analyzer®** products will accurately measure text complexity. This text measuring works just as well for English language learners as it does for native English speakers in:

- Aligning reading materials with readers' abilities, and
- Tracking growth as readers' abilities increase.

### Discover three licensing options. All share the following features:

- Offer a one year renewable license
- Analyze digital texts using the Lexile Analyzer software
- Report Lexile measures and other text metrics within seconds
- Allow users to type, copy and paste or upload files for analysis
- Analyze unlimited text lengths

### Which option is right for your company?

## Do you want to offer Lexile measures for a large collection of books?

---

Licensing the *Lexile*® Titles Database opens access to more than 560,000 informational and literary titles with Lexile measures from hundreds of publishers. Integrate the Titles Database into your product or reading program, service or library catalog and give millions of students, families and teachers the information they're looking for with Lexile measures.

With a yearly licensing agreement for Titles Database, you can:

- Populate book data, library records, websites and catalogs with Lexile measures.
- Create searches based on Lexile measures and other bibliographic data.
- Access our ever-expanding database of ISBNs immediately after updates are made.
- Access data for English and Spanish ISBNs.

### *How Is the Titles Database Accessed?*

The Titles Database is offered as a CSV download or Application Programming Interface (API) for English and Spanish ISBN data. You can retrieve the entire database of Lexile measured ISBNs, get only the new results since your last query, or, with the API, get customized data without sifting through data that you don't care about by choosing different filters.

Our **Lexile® Find a Book** tool is powered by the Lexile Titles Database and is a go-to for finding books at a student's reading level with over a million searches each month. Help make the book selection process seamless for your customers by providing everything they need in one place.

The screenshot displays the Lexile Find a Book interface. At the top, a blue navigation bar contains a menu icon, the text "LEXILE & QUANTILE TOOLS", and a "My Account" link. Below the navigation bar is the "LEXILE FIND A BOOK" logo and a "New Search" button. The main content area is titled "Recommended Books" and features a grid of book covers including "Six Little Chicks", "Ducklings in a Row", "Mac and Cheese and the Perfect Plan", and "That Cat Can't Stay". Below this is a section for "Your Results: 45 books" with a "Newest Release Date" dropdown menu. The results are displayed in a grid of book covers, such as "Dog Named Doug", "Gay Wolves", "Potbellied Pig", "The Cat's Tale", "Mommy Loves You", "There's a Bison Bouncing on the Bed!", "Frogs", "Snow Leopard", "Sled Dogs", "Pig the Pug", "A Tale About Tails", "Let's Hold Hands", "Step This Way", "The Tree Doctor", "Poison Dart Frogs", "Nifty Noses Up Close", "Mac and Cheese and the Perfect Plan", "Six Little Chicks", "Jo MacDonald Saw a Pond", and "Ducklings in a Row". On the right side, a "Filters" sidebar allows users to adjust the "Lexile Measure Range" (BR400L to 2000L), select "Indicators" (EASIER or HARDER), expand sections for "Decoding", "Vocabulary", "Sentences", "Patterns", "Sentence Length", and "Word Frequency", and check "Lexile Codes" (AD, HL, IG, NC, BR, GN, NP). It also includes search boxes for "Categories" (Science & Technology, Animals, Bugs & Pets) and "Subcategories", and a "Book Interests" section with checkboxes for "Books in a Series", "Award-Winning Books", and "Lexile and Vocabulary by Chapter". An "Apply Filters" button is at the bottom of the sidebar.

**LEXILE**  
FIND A BOOK

MetaMetrics' Find a Book tool is driven by the Lexile Titles Database.

## Do you want to offer your customers sought-after vocabulary information?

Vocabulary is crucial for second language learning. *Lexile® WordBank* is a licensable database with current, academically relevant vocabulary that can be used to prepare and test students for the words they will face in learning across the curriculum.

Develop curriculum materials and assessments to target vocabulary that students should already know or to introduce new words. Query, filter and sort the WordBank to:

- Verify or create content for level appropriateness.
- Identify words used repeatedly across academic subject domains.
- Make relevant test items with vocabulary students have been exposed to.
- Integrate high-priority academic words for vocabulary instruction into materials and interactive tools.

Grade	Science	Math	Social Studies	General
1	gas plant liquid	equal solve subtract	citizen government nation	solve detail explain
3	organism photosynthesis cell	quotient compute variable	military official empire	clearly adaptation explanation
5	aquatic cellular inorganic	ratio formula calculate	conquest rebel rebellion	coordinate convey concern
6-8	eukaryote metabolism enzyme	integer algebraic midpoint	overthrow opposition unrest	approximate conjecture calculation
12	cyanobacteria metabolic ingest	equiangular concurrency tangency	politically regime domination	effectiveness incorporation counterclaim

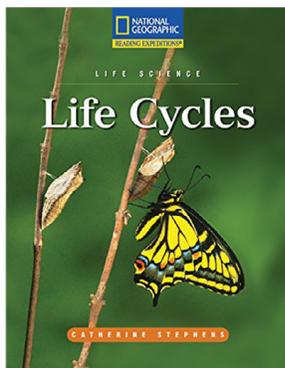

*Determine which words matter the most with Lexile WordBank.*

Use **Lexile® PowerV®** to develop vocabulary lists from books or text passages so your customers can:

- Pre-teach harder words.
- Focus on words that are important for understanding themes and topics.
- Discover ways to use base word knowledge to expand their vocabulary.
- Know the words that are important for school success.

PowerV is offered as an API or as an add-on service for Lexile text measurement. With the PowerV API:

- Create vocabulary lists for large quantities of texts.
- Develop lists by specifying different Lexile ranges from the same text to meet the needs of students with different Lexile measures.
- Access vocabulary lists for over thousands of titles with the Lexile Titles Database

**720L**

## Life Cycles Vocabulary List

instance	tender	amphibian	reproduce
observe	caterpillar	specific	recent
migration	adulthood	litter	scurry
mane	shrimp	grasshopper	operation
substance	geese	instinct	environmental

*By using this add-on, a Lexile PowerV vocabulary list (up to 20 words) will be returned with your certified Lexile text measure.*
